EDUCATION

National Institute of Technology (NIT), Tiruchirappalli

Trichy, India

Bachelor of Technology (B.Tech.) (3rd. Year)

Aug. 2023 – May 2027

Major in Production Engg. with Minor in Computer Science & Engg.

Dept. Rank 1 — CGPA: 9.85/10.0

AREAS OF INTEREST

Blockchain and Cryptography (Privacy-Preserving Computation, Traceability, Big Data), Cyber-Physical Systems and IoT Security, Industry 4.0 and Automation (Digital Twins, Simulation, AR/VR), Artificial Intelligence and Machine Learning, Sustainable Technologies and Smart Cities

PUBLICATIONS

- (Preprint) **VehiclePassport: A GAIA-X–Aligned, Blockchain-Anchored Privacy-Preserving, Zero-Knowledge Digital Passport for Smart Vehicles**, *arXiv:2509.06133 [cs.CR]*, 2025. Cross-listed in *cs.DC*, *cs.SE*, *eess.SY*. [arXiv](#) [🔗](#) - [DOI](#)

EXPERIENCE

National Institute of Technology (NIT), Tiruchirappalli

Trichy, India

Research Assistant - Circular Economy & Sustainability - Prof. S. Prasanna Venkatesan

Aug. 2025 – Present

- Advancing a Government of India funded project on carbon accounting, life cycle assessment, and traceability of refurbished devices; aligned with **ISO 14040/14044**, the **GHG Protocol Product Standard**, and delivering a **Digital Product Passport** tool with **12N QR-based device identities** for MSMEs.
- Implementing **component-level emissions models** (replacements, logistics, use-phase) using **vendor PCFs/LCI datasets** with a **DPRNN deep learning** model for richer temporal and nonlinear pattern capture; designing **verifiable certificates** (VC/NFT badges) to incentivize refurbishers and buyers beyond offsets.

Complere.xyz

Mumbai, India

Research Intern - Blockchain Scalability & RWA DLT

Jul. 2025 – Oct. 2025

- Engineering an **app-specific L2 rollout** on Cosmos-SDK to bridge RWA and stablecoin ecosystems, integrating **proto-danksharding (EIP-4844)**, **modular DA layers** (e.g., Celestia), and **optimized batching** delivering $\approx 3,000$ TPS, $< 1s$ latency, and 40% gas reduction.
- Investigating scaling primitives like **EIP-1559 fee markets**, **MEV mitigation** (mempool filters, inclusion rules), and **IBC/custom bridges** (ICS-20/27/29 with ZKP/SBT claims), while integrating **indexers and audit-ready settlement layers** to advance a secure, high-throughput L2 for RWA and regulatory use.

Matter Motor Works

Bangalore, India

Research Intern - Digital Identity & Vehicle Data Systems

May 2025 – Aug. 2025

- **VehiclePassport™** : extended to the **Battery Passport** under **EU Reg. 2023/1542**; engineered blockchain-anchored architectures aligned with **GAIA-X** and **Catena-X**, integrating **ZK proofs**, **dual-signing**, **access tokens**, and **verifiable ledgers** for privacy-preserving traceability.
- Prototyped **real-time telemetry pipelines** for IoT vehicle data anchoring and storage; applied **LSTMs**, **XGBoost**, **Autoencoders** for anomaly detection with 92% accuracy, 30% faster fault prediction, and **privacy-preserving access** in global automotive systems.

Miruvor LLC

Virginia, USA

Part-time Cryptography & Blockchain Researcher

Apr. 2025 – Present

- Built advanced wallet primitives including **multisig**, **MPC**, and **HD derivation**, with escrow and matchmaking protocols using **multi-currency stablecoin pools** to enhance security and usability.
- Developed **liquidity architectures** with **stablecoin baskets**, **AMM invariants**, and **AI-driven optimization**, achieving 25% lower slippage in **cross-chain settlement** and compliance-ready DeFi.

Spider R&D

India

Head of Blockchain Research

Sep. 2024 – Present

- Led research on advanced **ZK systems** (**zk-SNARKs**, **zk-STARKs**) and circuit frameworks (**Circom**, **Noir**); prototyped **privacy-preserving voting** and audited blockchain architectures for scalability and soundness.
- Led strategic initiatives with Xion Blockchain's R&D team, producing **INR 10L+ VC funding proposals**; optimized **verifiable data structures** (**Merkle trees**, **authenticated paths**) to enhance auditability and consensus security by 35%.

PROJECTS

On-chain ML Weights with ZK Proofs

Sep. – Oct. 2025

ETH Global

- Prototyped an **Ethereum-based inference layer** enabling deployment of **TensorFlow/PyTorch models** with privacy-preserving verification via **zkSNARK circuits (Circom, SnarkJS)**; leveraged **IPFS** for model storage and **L2 rollups** cutting proof costs by 40%.
- Engineered **gas-optimized smart contracts** for model registry, inference oracles, and payment flows, achieving **0.8s inference latency** while ensuring private model weights and verifiable predictions on-chain.

CosmoTrace - Permissioned Supply-Chain Ledger with MES/DT Anchoring

Jul. – Aug. 2025

Cosmos SDK & Ignite CLI

- Developed a **private chain** with **CometBFT**, implementing **ACL/PoA validators** and custom modules to log **orders, WIP, QC, and shipments** with **Merkle-proof auditability** and actor **DIDs**.
- Integrated **MES/digital-twin telemetry** via **OPC-UA/Modbus**, batched with **Ev-Stack rollups** and anchored on-chain; exposed an **IBC gateway** for inter-org traceability and external anchoring.

Programmable Escrow & Fraud-Resilient Marketplace Payments

Jun. – Jul. 2025

HackOn with Amazon - Season 5

- Built a **Solana escrow contract** in **Rust + Anchor** with **PDA vaults**, auto-releasing funds post return window and preventing refund/settlement fraud.
- Scaled **AWS** backend with **EventBridge, Lambda + Step Functions**, and **DynamoDB**; integrated **Amazon Fraud Detector** for 50K+ tx/day risk scoring at 95% accuracy with full auditability.

EchoPay - Voice & NLP Agent for Crypto Transactions

May – Jun. 2025

Monad Blitz & Google Cloud Agentic AI Day 2025

- Built an **agentic pipeline** on **Monad MCP servers** using **LangChain.js, Gemini Pro**, and speech-to-text to parse voice/text prompts into structured **txn JSON**, validated and executed as **smart contract calls**.
- Integrated a **multi-rail payment router** across CeFi & DeFi (banks, CEX APIs, Solana/Jupiter), with fraud/anomaly detection, **account abstraction**, and real-time execution at **1s block times, 10K+ TPS**.

Distributed Encountered-Type Haptics in VR

Oct. – Nov. 2024

Smart India Hackathon 2024

- Built a **Unity VR** prototype implementing **distributed encountered-type haptics (HapticBots)**: multiple tabletop bots reposition in real time via **WebSocket/UDP** control, physically rendering virtual textures aligned with user hand motion.
- Integrated **Z-buffer occlusion handling** and **raycast surface proxying** in Unity to detect hidden contact points under the hand mesh; bots adapt height/orientation using trajectory interpolation to maintain visual-haptic sync.

AWARDS & HONORS

- 2025** Selected for and completed **Amazon ML Summer School** among 60,000+ applicants
- 2025** Winner of **Solana CTF** by Microsoft Azure & Solana Superteam (rewards > **1.5 SOL**)
- 2025** Awarded **\$10K Solana Almighty Grant** for escrow scholarship platform **medici.ac**
- 2025** Achieved **Top 5** in **Monad Ecosystem Blitz** hackathon by Monad Blockchain (100+ teams)
- 2024** **1st Rank Medal**, highest academic performance across NIT Trichy (CGPA: **10.0/10.0**)
- 2024** Awarded **S. J. Chainlu Medal of Excellence**, best performer in Production Engineering
- 2024** Nominated for **Springer Nature Research Ambassador Program** by NIT Trichy
- 2023** Cleared **JEE Advanced**, one of the world's toughest engineering entrance exams (190K+ candidates)
- 2023** Secured **2nd Rank in Pune** (2000+ students) in **CBSE Class XII**, School Topper
